

COCONUT (COCOS NUCIFERA) OIL

Alodia coconut oil is expressed by centrifugal press from the meat of the fresh Thai coconut.

With a light texture and a mild aroma, it is a perfect coconut oil for massage leaving a lovely fragrant aroma on the skin without overwhelming coconut scent.

Coconut oil has a high Vitamin E content. It penetrates skin well and leaves it supple and hydrated. It works well on dry skin and is an excellent oil for after sun care.

Coconut oil can be used on its own but blends also well with several essential oils such as Lavender, Peppermint or Ylang-ylang. It can also be blended with some fruit fragrance for a more relaxed approach to massage.

Coconut oil is also a good addition in creams and scrubs adding moisturizing properties and anti-oxidant to your products.

Coconut oil is solid under 25° Celsius.
